CTI Controls Hillsong Auditorium

Complete Technology Integrations recently completed the lighting controls for the Hillsong Church at Castle Hill.

The New Hillsong Auditorium

Hillsong Church has a congregation of over 12,000 people and the new facility will be used to produce weekly television programs.

The lighting control system was offered as an alternative and provided better functionality. It includes room dimming, auditorium dimming, switching controls and DMX512 interface for master control during show production.

Inside The Impressive Auditorium

CTI was contracted by Wilken Service and the project was delivered on time and on budget.

CTI Demonstration Room

The Complete Technology Integrations demonstration room at North Ryde is now fully operational.

The CTI display include all major brands, all switch types, remote controls, dimming of low voltage lights, fluorescent lights, scenes, scenarios, moods, security and wired & wireless touch screens.

The room is often reconfigured to provide "Proof of Concept" for our clients and consultants.

The room doubles as the CTI Training Room with course bookings available now. For bookings call CTI on 9887 1000.

Welcome Aboard

The latest member of our growing team is Brad Bosworth. Brad joins CTI as an Integration Specialist and will be based in our North Ryde office. Brad comes to us from the data and communications industry. He can be contacted on 9887 1000, 0405 111 224 or by email on brad.bosworth@ctia.net.au
