Home Theatre controller package

CTI Remote Programming

CTI provides a remote support & programming service. The system includes modem and software that enables programming changes to be made from our North Ryde offices. This is being used for supporting mission critical sites, remote sites and in most cases, just to provide a better customer service.

Taronga Zoo Backyard to Bush

Backyard to Bush is a vast 2 hectare Australian journey of discovery at Taronga Zoo

The new precinct features a full scale urban house and backyard where you can see all the creatures that live amongst us, mice, ants, spiders and flies. In the Bush area you can see sheep, cattle and wombats.

CTI automation systems control modes such as "Day Zoo", "Night Zoo" and "Standby" to ensure the exhibit lighting and systems spring to life with just the right atmosphere with one button press.

The system controls;

- ✓ Pathway lighting
- ✓ Heating lamps
- ✓ Pumps and filtration
- ✓ Feature & Exhibit lighting
