

Hello,

Here is your personal copy of our October issue of CTI NEWS. I hope you find this interesting, useful and informative.

CTI Opens In Melbourne

August saw our Victorian operations start with the opening of our office at Suite 522, 1 Queens Road, Melbourne. Our Victorian operations are headed by David Wilson who has many years of automation experience. Dave will be available for all enquiries regarding lighting control systems for commercial, industrial & apartment projects. Dave can be contacted on his mobile 0405 111 225 or david.wilson@ctia.net.au.

The office numbers are: P 03 9820 9544 and F 03 9820 9566

Automation on the Web

CTI will shortly introduce a web based system for designing, ordering and delivering pre-programmed automation systems for our clients. Customers will have the choice of switches, programming features ie Welcome Home and Good Bye scenes and remote support options. For more information, please contact your local CTI office.

Energy Efficient IR Heaters

CTI extends its energy products to include Heatstrip panel heaters designed to deliver a comfortable and highly efficient radiant heat using Infrared technology. Upto 90% of heating is directed to the area to be warmed, while 10% is emitted as convective heat. This highly effective ratio means greater heating value while lowering heating costs.

Price Rise

On the 1st of October 2003 A Clipsal Integrated Systems price rise will take effect. If you have projects that are pending, please contact CTI to validate the proposal or to register and lock in the current pricing.

Welcome Aboard

In September Peter Coman and Peter Heynen joined the CTI team. Both peter's are Integration Specialists, with Peter H based in our Brisbane office and Peter C in our System office. Their email address are: peter.heyne@ctia.net.au and peter.coman@ctia.net.au Below are our office phone members.
